## PERSONNEL SAFETY

Personal safety mainly focuses on four factors, am I safe? are you safe? are we safe? and are they safe? Our video focuses on these contents and ensures understanding by each employee. In this, PPE (Personal Protective Equipment) is the mainstream in any workplace. It plays a vital role in EHS and Construction industries. PPE includes Eye and face protection, foot protection, head protection, ear protection, personal fall protection systems, respiratory protection and body protection suit.

## ENVIRONMENT AND HEALTH SAFETY

We are a video agency in Chennai helping customers across the globe that requires EHS Safety training. EHS is an acronym for the methodology that studies and implements the practical aspects of protecting the environment and maintaining health and safety at occupation. Slips and falls, near-miss safety all comes under EHS safety. These incidents are precisely recreated by us and shown to the employees to ensure the non-redundancy of those accidents.

## HEALTH AND HAZARDOUS SUBSTANCE

Any product or chemical that is explosive, combustible, oxidising, poisonous, corrosive, or toxic to the environment is called a hazardous substance. We create videos related to Wearing PPE, Chemical Storage, First Aid, Washing of body, Understanding safety rules and regulations of the workplace; such safety animated contents are available for training and awareness. Health safety includes restriction of alcohol and drugs, smoking, tobacco, explosives, corrosives and any flammable materials inside any factory.

## CONSTRUCTION SAFETY

Our Construction safety videos aim to ensure that a construction site or the industry as a whole is not the cause of immediate danger to the public around a construction site or the workers at a construction site, as well as making sure that the finished product of construction meets required safety standards. Scaffolding safety is a set of pre-emptive actions in building, inspecting, using, and tagging scaffolds. The scaffolds are built under the supervision of a trained person, assisting the workers in scaffold construction and ensuring their safety. Fall arrester is mandatory for any scaffolding work.

## EMERGENCY PLANNING AND RESPONSE

Emergency Preparedness and Response videos provide information training procedures of emergencies and the hazards to be aware of when a crisis occurs. It includes all possible emergencies, their effects, the measures that must be taken, defined processes, and available resources. Detailed lists of emergency response personnel entail contact information, duties, and responsibilities. Confined space, fire prevention, first aid, spill prevention, and housekeeping are also in.

## EQUIPMENT AND PROCESS SAFETY

Process safety is a disciplined framework for managing the integrity of operating systems and processes that handle hazardous substances. It deals with the prevention and control of events that can release dangerous materials and energy. It also includes crane safety, electrical safety, hand and portable power tools safety, forklift safety, welding safety, machine and machine guarding safety, lockout/tag-out and material handling.

## TRANSPORTATION SAFETY

Transportation safety is concerned with protecting lives and property through regulation, management and technology development of all forms of transportation. Workers travel to the workplace every day on a road that highly demands safety. Our Safety Animated Videos help and protect the employee from accidents. Our safety videos cover the restriction of mobile phones while driving, driving safely with a seat belt and respecting speed limits, addressing the unattended vehicles on the premises, handling heavy vehicles carefully, lifting and operating cranes and trucks and taking necessary safety precautions before proceeding.

## SAFETY ADMINISTRATION

An organisation can attain a zero-accident environment by effectively demonstrating safety animation videos to employees and conducting frequent audits. Following the EHS strategy and guidelines helps in protecting your employees vastly. Regular Inspections and training through LMS programs for employees also ensure their safety.

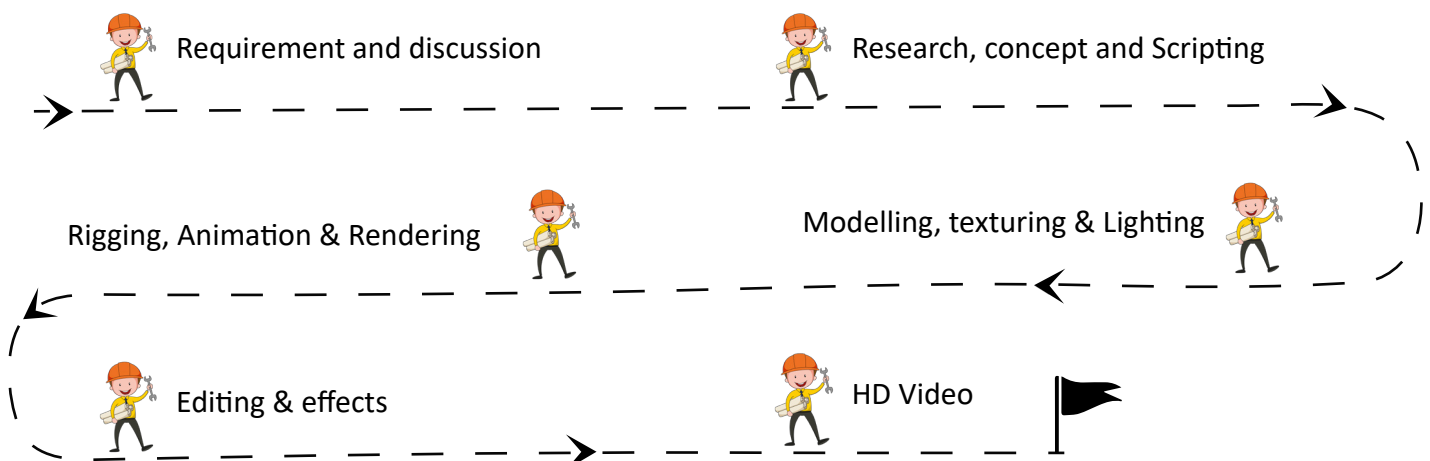

## INCIDENT RECREATION

Emergency Preparedness and Response videos provide information training procedures of emergencies and the hazards to be aware of when a crisis occurs. It includes all possible emergencies, their effects, the measures that must be taken, defined processes, and available resources. Detailed lists of emergency response personnel entail contact information, duties, and responsibilities. Confined space, fire prevention, first aid, spill prevention, and housekeeping are also in.
